March 3, 2009

To Whom it May Concern,

I enthusiastically recommend Dilek Nelson to teach math at the secondary level. Dilek was a student in my course Math 481 (Mathematical Statistics) at Rutgers in Fall 2007. This course was aimed at senior math majors, and Dilek had one of the top grades in the class. Dilek put a lot of effort into the class, as evidenced by her thorough and well-organized homework solutions. Moreover, Dilek's willingness to ask questions (and obvious desire to understand the answers) was a great benefit to the classroom atmosphere, as it encouraged other students to do the same. Dilek is fair, positive, and dignified, and she treats others with respect and is naturally respected by them in return.

I give Dilek my strongest recommendation for any position teaching mathematics. In view of her understanding of math, her attitude towards learning, and her way of presenting herself, I believe she will be an excellent teacher.

Please let me know if I can provide any further information.

Sincerely,  
Michael Zieve
